

Muhammad Osama

Frontend Developer

EXPERIENCE

Nov 2023 - Present

Sustainable Star LLC | Riyadh (Hybrid)

FRONTEND DEVELOPER

At Sustainable Star LLC in Riyadh, I began as a Frontend Developer and was soon promoted to Senior Frontend Developer, where I led a team of three developers. My role involved working on multiple microservices and building innovative tools to enhance the company's offerings.

- Led the development of a **drag-and-drop** form builder, similar to Canva.
- Utilized technologies like **Redux**, **Tailwind**, **OTP** and displaying data to **graphs**.
- Collaborated with cross-functional teams on multiple **microservices**.
- Knowledge about libraries for **internationalization** (implementing changes for English and Arabic) Right to Left.
- Demonstrated experience in integrating and managing **payment systems** (Moyassar) within web applications.
- Write clean, maintainable code and develop **helper functions** and **reusable components**

Feb 2023- Nov 2023

SuperKick Branding | United States, Texas (Remote)

FRONTEND DEVELOPER

My main objectives are:

- Collaborated with clients and to translate **Figma designs** into fully implemented code features.
- Knowledge of modern development tools like **GIT**, **Jira** and **Slack**
- Experience in managing **CI/CD pipelines** and skilled at **resolving merge conflicts** to ensure smooth development workflows and maintain code integrity

Apr 2020 - Feb 2023

Renewbe | Austria, Vienna (Remote)

CO-FOUNDER | FULLSTACK DEVELOPER

Co-founded a startup focused on accelerating the sustainable energy transition through community solar gardens. Key contributions included:

- Collaborated with designers, project managers, and developers to translate **Figma designs** into fully implemented code features..

PROJECTS

HACKATHON WINNER

1st position AI Hackathon by peer review sponsored by [Convex](#). Project used **Threejs** 3D models and **ChatGPT API** for voice simulation in the game.

[Demo](#) [View Code](#)

TRAVELGUIDE

Full-stack app, powered by **Next.js 13**, **TypeScript**, **Prisma**, and **MongoDB**, enables users to store and explore a wide range of travel experiences shared by new members joining the platform.

[Demo](#) [View Code](#)

HOMERUN

HomeRun: Is a **E-commerce** website with **custom backend entries** and secure payment linked with **STRIPE** payment method. It utilizes **Redux toolkit** as state management tool, **Prisma** and **Tailwind CSS**.

SERIES ONLINE

[Demo](#) [View Code](#)

A modern movie website that showcases upcoming movies, provides reviews and ratings and allows users to search. It utilizes **Redux Toolkit** for **state management** and **OAuth** with **Firebase** for authentication of users.

SUPERKICK BRANDING

[Demo](#) [View Code](#)

As part of the Superkick Branding team, I contributed to the development of multiple **modern websites** that effectively rebranded companies and aligned them with their missions.
